

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	03 October 2026
Team ID	SWTID-2026-9943
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts for implementing Client Scripts and UI Policies on the ServiceNow Incident form, even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Implement Client Script & UI Policy brainstorm

Use this template in your own brainstorming sessions so your team can unleash their imagination and shape ideas for Client Scripts and UI Policies on the Incident form.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

>

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A Team gathering

Define who should participate in the session (ServiceNow admins, developers, ITSM process owners) and send an invite. Share Incident form requirements ahead of time.

B Set the goal

Think about the problem you'll be focusing on solving: controlling Incident form behavior with Client Scripts and UI Policies.

C Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we implement Client Scripts and UI Policies on the Incident form to make fields dynamic, mandatory or read-only and validate user input, so that incident data is accurate and the form is easy to use?

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Person 1			Person 2			Person 3			Person 4		
Hide field	Mandatory	Auto-fill	onChange priority	Duplicate warning	Read-only closed	onSubmit check	VIP message	setValue	Test first	Document	UI policy first
Phone check	Show by category	Empty alert	Close notes	onLoad default	Group filter	Hide on mobile	Short desc limit	Show Resolved	No GlideRecord	All views	Script if needed

Person 5			Person 6			Person 7			Person 8		
Condition builder	Reverse if false	Run scripts option	g_form API	g_user roles	Async calls	Impact + urgency	Contact type	Resolution code	Mobile support	Service Portal	Review in UAT
Order of policies	Global scope	Inherit table	Reference lookup	Reduce server hits	Debug console	On hold reason	Reassign alert	Template use	Update set	Access control	Rollback plan

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

UI Policy: show, hide, mandatory and read-only fields

Hide field	Mandatory	Read-only closed	Show Resolved
------------	-----------	------------------	---------------

Client Script: validate data and react to changes

onSubmit check	onChange priority	Duplicate warning	Phone check
----------------	-------------------	-------------------	-------------

onLoad defaults and auto-fill for faster entry

onLoad default	Auto-fill	VIP message
----------------	-----------	-------------

Testing and best practices

Test first	Document	UI policy first
------------	----------	-----------------

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes
